Education

Shanghai Jiao Tong University 2025 – Present
Dual Bachelor's Degrees in Finance and Computer Science and Technology Average: 89.6/100 Rank: Top 30%

Relevant Coursework

- **Mathematics:** Calculus, Linear Algebra, Probability and Mathematical Statistics, Discrete Mathematics
- **Other:** Programming Concepts and Methods, Data Structures and Algorithms, Principles of Economics, Political Economy, Principles of Management

Experience

RoboMaster, SJTU JiaoLong Team Sep. 2025 – Jul. 2026
Computer Vision Team Member

- Worked on computer vision tasks and led the development of a model predictive control (MPC) algorithm for gimbal control.
- Assisted with neural network training, including data annotation and preprocessing.

Projects

Cross-Border Trade Credit and Risk Decision Agent Aug. 2026 – Present

- Designed and implemented a cross-border trade risk decision system for merchants, integrating customer credit assessment, a rule engine, Isolation Forest anomaly detection, risk exposure calculations, and retrieval-augmented generation (RAG) for knowledge retrieval. Provided traceable risk analysis and transaction recommendations for large orders, trade credit, and anomalous payer identities.
- Built a stateful Risk Decision Copilot using FastAPI, Next.js, and DeepSeek, combining controlled tool calling, RAG, a rule engine, and Isolation Forest anomaly detection to deliver traceable risk analysis and recommended transaction terms for foreign trade orders.

Quantitative Trading System Based on a Dual Moving Average Strategy Jun. 2026 – Aug. 2026

- Built a backtesting system for a dual moving average trend strategy, covering data loading, indicator calculation, signal generation, trade execution, portfolio value tracking, and performance evaluation.
- Implemented transaction fees, slippage, position updates, trade logs, and calculations of maximum drawdown, annualized return, annualized volatility, and Sharpe ratio.

Skills and Certifications

- **Programming Languages:** C++, Python
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **Machine Learning:** XGBoost, PyTorch, TensorFlow
- **Operating Systems:** Linux, Windows
- **Languages:** English: CET-6, 588

Competitions

- **Honorable Mention**, 2026 Mathematical Contest in Modeling (MCM)
- **Third Prize**, 2025 15th Asia and Pacific Mathematical Contest in Modeling (APMCM)
- **Third Prize**, Chinese Mathematics Competitions for College Students (Shanghai Division)
- **Top 8**, RoboMaster University Championship 2026 (Southern Regional)

Student Activities

Student Representative 37th Student Congress 2025 – 2026
Staff Member Organization Department, Antai College of Economics and Management 2025 – 2026

Honors

Outstanding Communist Youth League Member 2026
Ranked 3rd in the major in the Comprehensive Evaluation 2025 - 2026
